# The natural beauty of organic shapes

Owner Nestor & Rotsen | Art Director, Devi Vervaeke

The story of Nestor & Rotsen began with Devi Vervaeke, whose passion for material development ignited during his formative years. Growing up as the children of an painter and the grandchildren of a skilled furniture craftsman, Devi and his brother Denneb were immersed in a world of creativity from a young age. Despite pursuing different educational paths — Devi as a contemporary classical pianist and composer, and Denneb as a graphic designer — their shared love for materials brought them together after completing their studies. In their quest to explore their artistic roots, the brothers embarked on a journey of material experimentation. Denneb nurtured the growth of their patina workshop, while Devi began sculpting with various materials. It wasn't long before he discovered the captivating allure of ceramics, inspired by the textures, colors, shapes, and organic erosions found in nature. This revelation sparked a vision that soon blossomed into an extraordinary collection, unlike anything seen before — Nestor & Rotsen.

Since those early days, Nestor & Rotsen has evolved into a renowned design studio worldwide and a thriving workshop where their unique creations come to life, together with their strong creative team.

The world has taken notice, and their captivating designs have garnered global acclaim.

Today, Nestor & Rotsen stands as a testament to the harmonious marriage of natural materials and innovative techniques. Their exclusive objects embody organic forms and celebrate the beauty of imperfections, paying homage to the perfect balance found in nature's artistry.
